NAAC Accrediated ISO Certified 9001-2015,14000-2015

During the lecture Dr. Mane gives detailed information on the practical aspect of the ultrasound examination in obstetrics and gynecology with technical details such as how to hold and orient the transducer, operate the ultrasound equipment and diagnose complex obstetric and gynecologic abnormalities. .

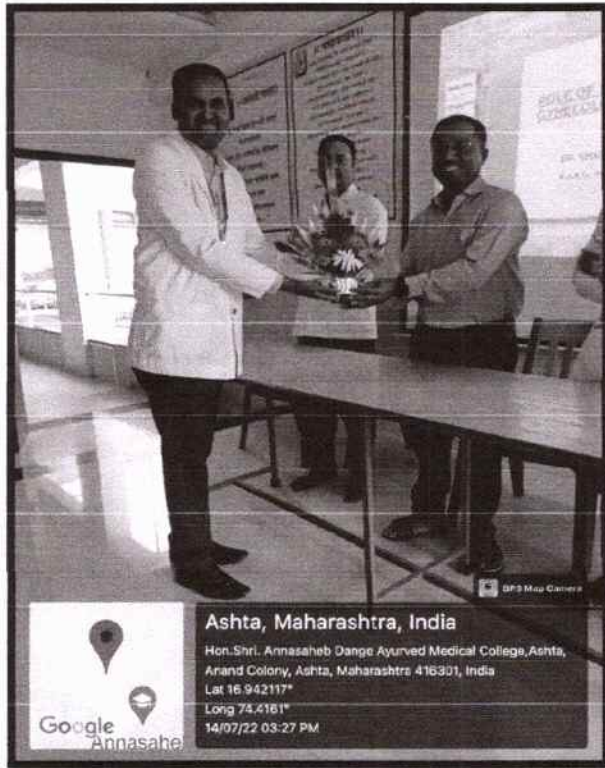

He discussed about The introduction of ultrasound to obstetrics and gynecology has made tremendous impact to patient care as it allowed imaging of the fetus and placenta in obstetrics and maternal internal organs in gynecology with such clarity to allow advanced diagnosis and also to guide various life saving interventions. Understanding the physical principles of ultrasound is essential for a basic knowledge of instrument control and also for understanding safety and bioeffects of this technology Improving maternal health and child survival.

The session was very interactive and informative. Lecture was attended by 4 th year Students, PG Students, Interns along with faculty members. Students learned lots of things about Ultrasound.

**Number of Participants:** 150

#### **Outcomes & Objectives Achieved:**

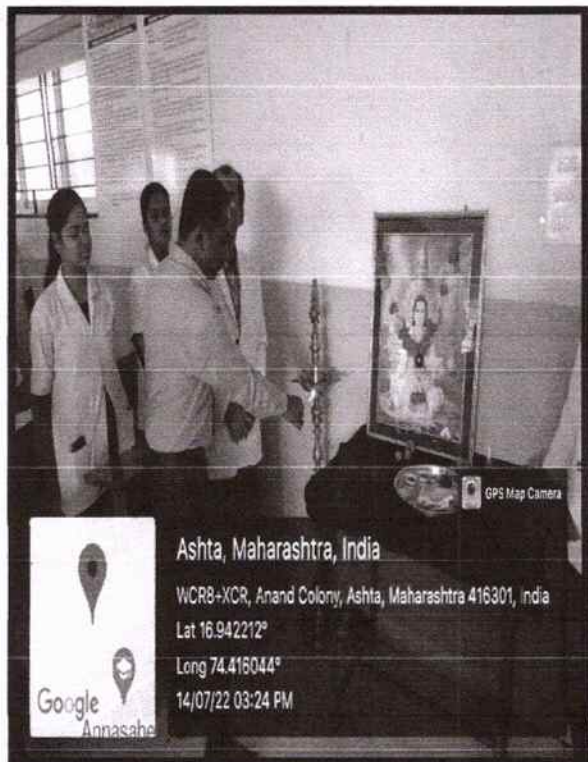

1. The student understood Basic Knowledge about Ultrasound in Obstetrics & Gynaecology.
2. The students able to read the Sonography reports and can correlate clinical interpretation.
